APPLICATION 19511

ORDER

PERMIT 13006

LICENSE 8306

ORDER ALLOWING CHANGE IN PLACE OF USE
AND ADDITION OF A POINT OF DIVERSION

WHEREAS:

1. License 8306 was issued to Louis and Dorothy Bugni and John E. and Mary Frances Coyle and was recorded with the County Recorder of Sutter County on February 7, 1968 in Volume 718, Page 624.
2. License 8306 was subsequently assigned to Louis D. and Mary F. Bugni.
3. A petition for change in place of use and addition of a point of diversion has been filed with the State Water Resources Control Board and said Board has determined that good cause for such changes have been shown.
4. The Board has determined that the petitioned changes do not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.

NOW, THEREFORE, IT IS ORDERED THAT:

1. The added point of diversion under this license shall be:
Due North 1,240 feet from the S $\frac{1}{4}$ corner of Section 28, T17N, R2E, MDB&M, being within SE $\frac{1}{4}$ of SW $\frac{1}{4}$ of said Section 28.
2. The added place of use under this license shall be:
80 acres within the SE $\frac{1}{4}$ and SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 28, T17N, R2E, MDB&M.
3. The continuing authority provision in this license shall be amended to contain Section 761(a), Title 23, California Administrative Code which reads as follows:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights privileges under this license are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
